Chancellor

The Chancellor is built to the highest of UK manufacturing standards, and comes with a 5 year warranty on the heavy duty frame, for your peace of mind. This dual motor chair helps you to get into and out of the chair with ease, with the dual motor mechanism allowing you to control the backrest and footrest independently. Fitted with a luxurious waterfall adjustable back cushion, together with generous layers of foam and a multiple sprung seat base, the Chancellor offers ultimate comfort for the perfect restful haven during the day. The back cushion is independently adjustable allowing you to get the comfortable seating positon you need. The easy to use back-lit hand controller (which is suitable for both left or right hand use), controls the smooth and quiet motors, making it simple, safe and speedy to stand and sit. The Chancellor sits in our premium range with extra features including the tilt-in-space action, which can take up to 25st. this works by maintaining a consistent angle between the base and back of the chair, as the footrest is elevated, therefore considerably reducing the occurrence of pressure sores by evenly spreading the preassure when seated. The high leg elevation position can also hlep improve your circulation and other mobility restrictions. Large pockets are also located on each side for ease of storage space allowing easy access to all the things you need. The complete Chancellor collection is available for express deliver in a range of modern premium fabrics to suit your interior style.
